

# identiMetrics featured as part of PowerSchool

## Classroom of the Future at ISTE 2017

identiMetrics Biometric ID Management™ integrates attendance easily and accurately in PowerSchool's Unified Classroom

JENKINTOWN, Pa., June 30, 2017 /PRNewswire-iReach/ -- identiMetrics, a PowerSchool ISV Partner, was featured as part of PowerSchool's Classroom of the Future at the ISTE 2017 conference in San Antonio, Texas. The Classroom of the Future integrates a seamless, connected experience with PowerSchool's Unified Classroom in an environment that engages parents and students, and gives teachers instructional time back into their day. PowerSchool's Unified Classroom is a single comprehensive technology platform for learning, instruction, grading, assessment, and management of student data. identiMetrics works with PowerSchool on the attendance side, simplifying the school day for administrators, teachers and students.

"identiMetrics is honored to be a part of PowerSchool's Classroom of the Future at ISTE 2017," said Dr. Jay Fry, identiMetrics' President and CEO. "As a former school principal and administrator, I know the frustration surrounding attendance issues for both teachers and administrators. identiMetrics Biometric ID Management™ provides the highest level of accuracy and real-time attendance information for administrators while eliminating the tedious and time-consuming task of attendance for teachers. By integrating directly into PowerSchool, identiMetrics aligns beautifully with PowerSchool's vision of the Unified Classroom."

"identiMetrics Biometric ID Management™ is used for meeting attendance (period-by-period classroom attendance), daily attendance at the front entrance, 1st period classroom or homeroom classroom, and late attendance where tardy students are processed right into PowerSchool and can

go directly to class," Dr. Fry continued. "Because identiMetrics works as a platform, the students can also be identified in many other areas that require identification, for example, the cafeteria POS software and library software. What's more, the Classroom of the future is available today," he added.

#### About identiMetrics

identiMetrics Biometric ID Management™ is for school administrators and managers who are interested in simplifying identification management for students and staff. Our award-winning biometric technology was developed by educators for the unique needs of K12 schools. identiMetrics Biometric ID Management™ simplifies your school day by providing efficient, accurate, hassle-free accounting and metrics. From your seasoned staff down to the kindergarten students, identiMetrics™ is 100% accurate, safe and secure. As for our customer support and services - our only option is excellence. identiMetrics Biometric ID Management™ can provide identification to all of the leading education software with one common biometric database in the cafeteria, for attendance, library, time clock, for dances and athletic events - everywhere when accurately identifying students and staff is required. identiMetrics Inc. is a proud signatory of the Student Privacy Pledge.
